Experience

Headway Software Solutions — Business Analyst Intern Oct 2025 - Sep 2026

- %ÏElicited, analyzed, and documented business requirements for software solution projects from 18+ cross-functional stakeholders and SMEs, facilitating requirements workshops and translating business needs into 80+ user stories, acceptance criteria, BRDs, and FRDs in Jira and Confluence that improved sprint delivery efficiency by 20% across 20+ two-week sprints.
- %ÏLeveraged SQL, Excel, and Tableau to analyze operational data, develop 4 interactive dashboards, and reduce weekly manual reporting efforts for leadership teams by 35 hours.
- %ÏConducted business process analysis through stakeholder interviews, BPMN process models, swimlane diagrams, and current-state/future-state mapping for 25+ workflows, identifying improvement opportunities that reduced manual process dependencies by 30% and improved operational efficiency.
- %ÏReduced post-development defects and rework by 35% by coordinating requirement validation, UAT activities across 4 major release cycles in Jira and Azure DevOps, project risk tracking, and stakeholder communications with product owners, developers, and QA teams, ensuring alignment between business requirements and delivered solutions.

Alberta AI & Tech Innovation Club — Business Analyst Intern Dec 2024 - July 2025

- %ÏFacilitated product discovery workshops across platform leads, academic mentors, and 50+ pilot student users; owned the Jira backlog, decomposing high-level platform epics into 40+ user stories with Gherkin-format acceptance criteria and technical API specifications.
- %ÏMapped end-to-end student onboarding and intake journeys in Microsoft Visio, standardizing operational handoffs between advisors and the automated system to accelerate consultation turnaround times by 35%.
- %ÏEngineered Power BI tracking models using SQL and Excel to evaluate student engagement funnels and drop-offs, synthesizing user feedback into prioritized backlog enhancements that lifted user retention by 20%.
- %ÏDirected UAT across 3 AI simulation releases—authoring 80+ test cases to evaluate generative prompt accuracy, edge cases, and response latency, partnering with developers to cut post-release defects by 30%.

Certifications

Entry Certificate in Business Analysis (ECBA™) — IIBA (In Progress)

PwC Technology Consulting Simulation — Certificate

- %ÏCreated client discovery interview guides, prioritized user stories, and built an MVP roadmap for legacy compliance system modernization.

KPMG Advisory & Data Analysis Simulation — Certificate

- %ÏEvaluated supplier performance data using AI to deliver strategic growth recommendations to leadership.

Leadership & Projects

Northwind Traders Sales Analytics & Business Intelligence — Project Link

- %ÏAnalyzed end-to-end sales operations across customers, products, orders, and logistics and applied advanced SQL techniques (joins, aggregations, subqueries, CTEs) to translate sales trends.

Retail Profitability Analysis Dashboard — Project Link

- %ÏBuilt an interactive Tableau dashboard analyzing 4 years of Superstore sales data and designed drill-down and geographic mapping to identify loss-making products and present profitability recommendations.

HR Analytics Dashboard — Project Link

- %ÏDeveloped a self-service HR analytics dashboard in Excel analyzing workforce data for 1,470 employees and identified high-risk attrition segments to present retention strategy recommendations.

Education

Southern Alberta Institute of Technology (SAIT), Calgary, Canada - Diploma in Software Development

Skills

Business Analysis & Agile: Requirements Elicitation, Stakeholder Analysis, User Stories & Acceptance Criteria, BRD/FRD Documentation, Process Mapping (BPMN 2.0 / Swimlanes), Gap Analysis, Current/Future-State Modeling, UAT Coordination, Requirements Traceability (RTM), SDLC, Agile & Scrum

Systems, BI & Data: Jira, Confluence, Visio, Lucidchart, Azure DevOps, SQL, Tableau, Power BI, Advanced Excel

AI & Workflow Automation: Prompt Engineering, Workflow Automation, Microsoft Copilot, ChatGPT, Claude, Perplexity
